

## Institutional Academic Meeting

With globalization impacting our lives in no uncertain terms, it is very important to educate learners to be global citizens. Global Citizenship Education includes various aspects such as education for respect for cultural diversity, human rights education, peace education, education for sustainable development, local and global justice, and education for gender equity. It is very important to build a feeling of mutual trust and respect among people of diverse cultures. Equally important is the exercise of human rights, which ensures everyone's dignity so as to enable the development of human potential to the fullest. Denial of fundamental and human rights can create conditions of social and political unrest leading to violence and conflict within societies and among nations. Building a gender-neutral world is also a prerequisite for a just and humane society. Equally important is conservation of resources to save the environment.

The initiative was to develop action plans on below mentioned areas for quality improvement in the institute.

1. Integrating pedagogies to build 21st century skills among learners.
2. Sensitizing the learners about gender equity, peace, respect for multiculturalism ,human rights and SDG 17 in the process of teaching -learning through various disciplines.
3. Initiating multi- modal ways of teaching in classrooms like drama, and excursions.
4. Initiating a no Polythene campus campaign.
5. Initiating a Green campus campaign with plantations through student initiatives.
